COMMISSIONING SERVICES

Garlington, Lohn &
Robinson Building
Missoula, MT

COMMISSIONING IS ESSENTIAL TO THE SUCCESS OF YOUR PROJECT

Commissioning is the process of ensuring all of your building's systems are performing as intended. This requires knowledge of each type of system and having the experience and tools necessary to test these systems for accuracy and efficiency.

Retro-commissioning is the same process as commissioning only it is performed on existing systems to locate components that need modification for optimal performance. Both types of engineering act as the quality control for your project and help ensure your building's operational systems perform the way they're supposed to.

DC Engineering has a dedicated team of professionals that do just this, commissioning and retro-commissioning, for new and existing structures. Find out more about our customized services by contacting us at any of our locations or on our website at www.dcengineering.net.

Polson, MT
- Staybridge Suites
Missoula, MT
- Whole Foods
Ocean Avenue
San Francisco, CA

CUSTOM DESIGN

DC Engineering's experience in commissioning goes beyond the standard. Our experienced team reviews the building's HVAC, refrigeration, and lighting system designs then tailors the commissioning process, schedule, and forms to the specific building system. This helps to ensure your equipment is operating at the most efficient level within the intent of the design.

BUDGET CONSCIOUS PLANNING

The bottom line can make getting quality work difficult. That's why DC Engineering customizes each project to maintain budget while still providing quality services.

Considerations we continually review include:

- Initial costs
- Maintenance expenditures
- Utility consumption

GREEN SOLUTIONS

We are proud partners with the U.S. Green Building Council, Building Commissioning Association, and ASHRAE. Together, we create and maintain economical solutions that are better for our communities and the environment.

THE OWNER'S DESIGN INTENTS

We bring to the table the owner, architect, and contractors to discuss and outline design solutions. When the Owner's Design Intents are clearly stated, we can then discuss the options for any possible scenario to arrive at the most balanced solution.

LET OUR DESIGN EXPERTISE AND EYE FOR DETAIL HELP YOUR PROJECT BE SUCCESSFUL.
